About Us

Introduction

Vasa Industries Is One Of India's Fastest-Growing Names In High-Visibility Clothing And Workwear. Established In 2019, We've Built Our Reputation Around One Simple Promise: Safety Gear That Workers Trust, Use, And Feel Comfortable In. With **ISO 9001:2015 Certification, BIS Licence And Sedex Certification**, We Bring Credibility, Ethical Responsibility, Discipline, And Quality Assurance Into Everything We Produce.

What We Offer

We specialize in high-visibility safety jackets and a full range of workwear & Hi Viz Accessories for industries where protection and performance matter most. Every product — from reflective vests to custom industrial uniforms — is engineered to meet strict safety standards while keeping comfort at the forefront. Our ability to customize designs and branding makes us the preferred partner for companies looking for gear that fits both function and identity.

Our Belief

For us, visibility is safety, but safety should never compromise comfort. We believe that reliable gear builds confident teams, and that trust is earned through consistency. At Vasa Industries, we don't just sell safety jackets and workwear— we provide protection that supports frontline workers shift after shift. Our vision is to become India's most trusted name in industrial workwear by staying practical, transparent, and committed to quality.

VASA INDUSTRIES IS A LEADING MANUFACTURER OF HIGH-VISIBILITY SAFETY WEAR, PROUDLY HOLDING A BIS (BUREAU OF INDIAN STANDARDS) LICENSE. THIS PRESTIGIOUS CERTIFICATION ENSURES THAT OUR PRODUCTS MEET THE STRINGENT QUALITY AND SAFETY STANDARDS SET BY THE INDIAN GOVERNMENT.

Standard Description: This standard outlines requirements for high-visibility warning clothes, ensuring they're visible during both day and night. It covers aspects like materials, design, and performance testing. **Purpose:** The primary goal is to provide conspicuity, reducing accidents and enhancing safety for workers in various industries, such as construction, transportation, and emergency services.

Classification: The standard categorizes high-visibility clothes into different classes based on their visibility performance, with Class 3 offering the highest level of visibility. **Applications:** These clothes are recommended for workers who need to be visible in low-light conditions, such as gangmen, trackmen, and other railway personnel.

Some key requirements of IS 15809 include :-

Materials: High-visibility materials used should meet specific standards for visibility and durability.

Design: The design of the clothes should ensure maximum visibility, with features like fluorescent colors and reflective strips.

Performance Testing: The clothes undergo various tests to ensure they meet the required standards for visibility, durability, and safety. The Bureau of Indian Standards (BIS) publishes and updates this standard, with recent versions being IS 15809:2017 and IS 15809:2019.

IS 15809 Standards Class I, Class II & Class III

Class I :- Class 1 garments are designed to provide a basic level of visibility and are often used in situations where the wearer is not exposed to high-speed traffic or complex backgrounds.

Class II :- Class 2 garments are designed for workers who are exposed to more hazardous situations than those in Class 1. These garments provide a higher level of visibility

Class III :- Class 3 garments are designed for workers who are exposed to the highest level of risk, such as those working in high-speed traffic areas or in complex environments. These garments provide the highest level of visibility

In-House Testing Lab

Vasa Industries is a leading manufacturer of high-visibility safety wear, proudly holding a BIS (Bureau of Indian Standards) license. This prestigious certification ensures that our products meet the stringent quality and safety standards set by the Indian government.
